1) Create an html page with have inline,external,internal css?

Program

Firstpage.html

```
<!DOCTYPE html>
<html>
<head>
<link rel="stylesheet" href="firstpage.css">
</head>
<style>
 .class1{
 color:red;

 }
 </style>
<body>

<h1 style="color:blue;">this is inline CSS</h1>
<h1 class="class1">this is internal CSS</h>
<img src="F:\flower-color.jpg">
<h1 class="class1">this is external css</h>
<h2 class="class1">NATURE</h2>
<p class="2">Nature in the broadest sense, is the natural, physical,
material world or universe. "Nature" can refer to the phenomena of the
physical world, and also to life in general. ... Although humans are part
of nature, human activity is often understood as a
separate category from other natural phenomena.</p>

</body>
</html>
```

Firstpage.css

```
.class2{
```

```css
        color:grb(85,5,58);

}
p{
        text-indent:900px;
        margin-bottom:30px;
}

body {
  background-color: lightblue;
   background-image:url("flower-color.jpg");
   background-attachment:fixed;
   background-position:center;
   text-align:center;
}

h1 {
  color: navy;
  margin-left: 20px;
}
```

output
